TARGET POSITIONING

Audiovisual Production Specialist / Technical Specialist / Show Technician / Touring Audio Technician. Target higher-paid full-time, contract, staffing, corporate-event, hotel-production, touring, and freelance A/V opportunities. Current Encore compensation: \$34/hour.

VERIFIED SUMMARY

Audiovisual technician and production professional with more than 10 years of experience supporting corporate events, conventions, hotel productions, theatrical tours, galas, meetings, and live performances. Experienced in audio, video, projection, lighting, staging, rigging support, power distribution, show operation, troubleshooting, crew leadership, and client service. Comfortable working independently or leading crews of approximately 12–30 technicians in fast-paced environments where timing, safety, communication, and reliability are essential.

VERIFIED SKILLS

- Live audio setup, operation, routing, mixing, and troubleshooting
- Wireless and wired microphones, playback, communications, and signal flow
- Projection, displays, switchers, converters, distribution, and video systems
- Corporate meetings, general sessions, breakout rooms, galas, and conventions
- Lighting, staging, rigging support, and high-voltage power distribution
- Show calling support, technical advancement, room transitions, and rehearsals
- Equipment testing, maintenance, inventory, cabling, and rack integration
- Crew leadership, labor coordination, client communication, and hospitality
- Load-ins, load-outs, truck packing, touring logistics, and venue transitions
- Windows, macOS, Linux, presentation systems, networking, and computer support

VERIFIED EXPERIENCE

Encore — San Diego, California

Technical Specialist / Show Technician / Former Supervisor of Event Technology

December 2013–Present

- Supports corporate meetings, conventions, presentations, galas, hospitality events, and large-scale hotel productions.
- Installs, tests, operates, troubleshoots, and strikes professional audio, projection, video, lighting, staging, communications, and power-distribution systems.
- Serves as technical and labor lead for crews of approximately 12–30 technicians.
- Coordinates room setups, rehearsals, show operation, breakout-room changes, event transitions, and load-outs.
- Works with clients, presenters, event planners, hotel personnel, and production teams to identify technical requirements and resolve problems.

- Troubleshoots signal flow, cabling, computers, presentation systems, microphones, speakers, displays, projectors, switchers, converters, and related equipment.
- Previously supervised event-technology operations, staffing, equipment preparation, and show execution.

Work Light Productions — *Jesus Christ Superstar*

A2 / Touring Audio Technician

United States and Canada | October 2021–August 2022

- Supported the touring audio department for a national theatrical production.
- Prepared, tested, maintained, and troubleshoot audio equipment before and during performances.
- Assisted with microphones, cabling, communications, computers, processing equipment, racks, and performance preparation.
- Participated in load-ins, load-outs, truck packing, travel days, and venue transitions.
- Helped maintain consistent system operation across theaters with different technical conditions and infrastructure.

Work Light Productions — *Rodgers + Hammerstein's Cinderella*

Touring Audio Technician

United States | January 2017–May 2019

- Traveled with and supported the audio department for a national Broadway-style theatrical tour.
- Built, maintained, transported, and operated audio and video processing racks and related production equipment.
- Performed system checks, equipment preparation, troubleshooting, repairs, cabling, inventory, and performance support.
- Assisted with load-ins, load-outs, truck packing, backstage communications, and rapid venue changes.
- Worked with local crews while maintaining established technical and safety standards.
- Supported reliable performances under demanding touring schedules and changing venue conditions.

Turn Key Event Labor

Freelance Audiovisual Technician

San Diego and Los Angeles, California | 2015–2021

- Provided freelance audio, video, lighting, staging, and general production support for hotel and convention events.
- Installed and struck audiovisual equipment, presentation systems, displays, projectors, speakers, microphones, lighting, staging, and cabling.
- Assisted with room transitions, equipment troubleshooting, show operation, load-ins, and load-outs.
- Adapted to different venues, production companies, equipment packages, and crew structures.

Access Professionals

Installation Technician

San Diego, California | December 2013–December 2015

- Assisted with professional technology and audiovisual installation projects.
- Installed equipment, cabling, mounting systems, infrastructure, and related components.
- Used technical drawings, tools, measurement, testing, and troubleshooting to support completed installations.
- Worked safely and professionally in active commercial environments.

3DVR.TECH

Founder and Technical Director

December 2022–Present

- Develop open-source technology, audiovisual, web, computing, and interactive-media projects.
- Research networked show-control systems capable of coordinating audio, video, lighting, devices, and automation.
- Build and maintain websites, software prototypes, technical documentation, and computer systems.
- Apply programming, networking, Linux, and systems-integration knowledge to production and audiovisual workflows.

EDUCATION

Clemson University

Bachelor of Arts in Production Studies in Performing Arts; Audio Technology concentration; Music minor | 2012

Coursework and practical experience included audio engineering, music, recording, theatrical production, live sound, performance technology, and audiovisual arts.

University of California San Diego Extension
